

recordclass — The Tower Problem

```
recordclass state sofar left target;
vars start_state;
consstate([], [1 2 4 5 9], 12) -> start_state;
sofar(start_state) =>
** []
isstate(start_state) =>
** <true>
isstate([1 2 4 5 9]) =>
** <false>
start_state =>
** <state [] [1 2 4 5 9] 12>
17 -> target(start_state);
start_state =>
** <state [] [1 2 4 5 9] 17>
```
